

MAXI ADULT

COMPLETE FOOD FOR LARGE BREEDS ADULT DOGS

CHICKEN

PETTYS MAXI ADULT CHICKEN is a complete and balanced food suitable for large breeds of adult dog, formulated with chicken as the selected source of animal protein. Pettys kibble is made with our exclusive "Triple-layer" process which utilises different cooking times for the different raw materials to obtain more easily digestible starches. Moreover, animal proteins, minerals and vitamins are cold blended to preserve all their nutritional and organoleptic qualities, without submitting ingredients to an additional heat treatment. It contains FOS and MOS that promote gastrointestinal well-being and support a strong immune system, helping to develop the natural immune defenses, chondroitin, glucosamine and MSM (methyl-sulfonyl-methane) for the development of joints and bones, and spirulina to help maintain the vitality and the general well-being of the dog. It also contains yucca schidigera which helps to reduce waste-odour.
